

Cats Whiskers

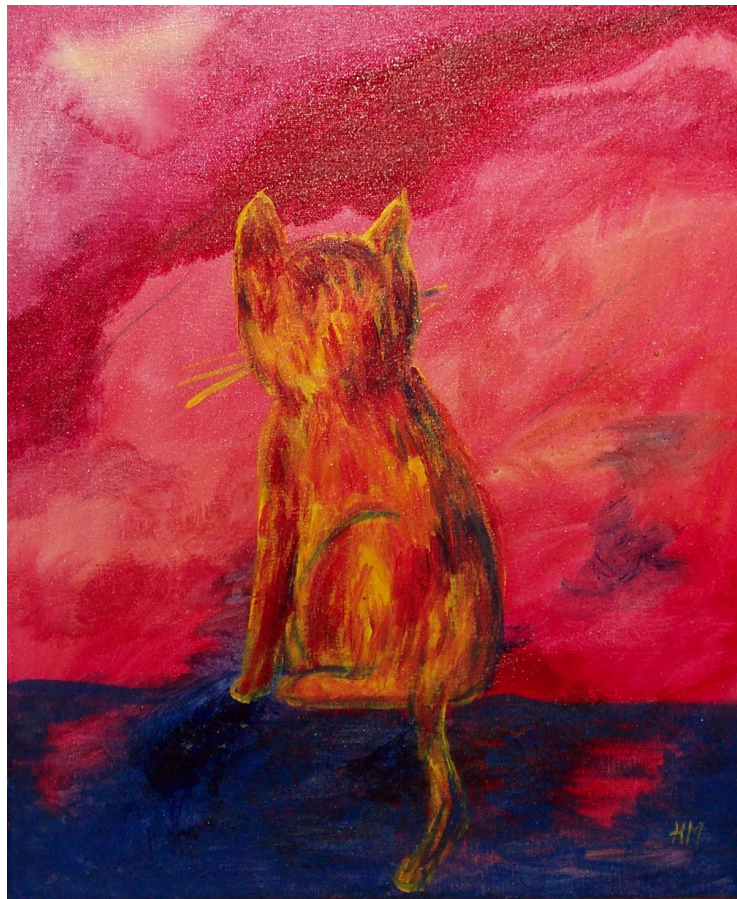

A collection of paintings that capture the elegance, absurdity, and everyday magic of our feline companions—each one, I hope, a little bit of *the cat's whiskers*.

My paintings explore the curious charm of cats—their serene stillness, sudden mischief, and that uncanny ability to make the ordinary feel strange and sacred. I'm drawn to the quiet humor and mystery in their gestures, the way they stretch across a sofa or vanish into a shadow.

Through colour and texture, I try to capture not just what cats look like, but how they *feel*—both familiar and elusive, everyday companions and each cat is a puzzle of moods and moments

These pieces are a playful homage to feline contradictions: wild and tame, aloof and affectionate, absurd and graceful.
